## Prescription facial treatments

All our prescription facials use Zein Obaji skin products (skin health and medical ranges) as well as Hydrafacial and LED technologies. Customised ZO prescription skincare is available to purchase in conjunction with all treatments.

All patients must discontinue all retinoids and acids 48 hours prior to any facial treatment. If prone to herpes, antivirals must be prescribed for any facial treatments – please advise your aesthetic nurse on the day of treatment or contact the office prior to your appointment.

**Our prescription facials are grouped into three tiers of reactivity and downtime (mainly redness/ peeling) as follows:**

**Gold:** Minimal reaction, minimal discomfort, little/no downtime.

Treatments vary from 30 minutes to a luxurious 1.5 hours with all the frills!

**Silver:** Slight reaction, slight heat/ tingling/ discomfort, 1-4 day downtime.

**Platinum:** Reactive, some peeling and downtime expected: 3-5 days.
